Possesses a Bachelor of Science in Computers and a strong foundation in C , java , HTML and javascript coupled with exceptional communication and analytical skills, all of which combine to make a valuable asset in the industry.

Experience

Intrrnshala treaning
script kiddies hackers
Dec 2023 – Feb 2024

Conduct Penetration Tests and Vulnerability Assessments for an organization, SecureCorp. Generate a comprehensive VAPT report to formulate an effective security assessment and defense plan.

Microspectra Software Technologies
Laravel Developer
Feb 2024 – May 2024

As a Laravel Developer Intern, I will assist in developing and maintaining web applications using the Laravel framework. Responsibilities include writing clean, efficient, and secure code, collaborating with senior developers, troubleshooting issues, and contributing to the overall project lifecycle. Ideal candidates should have a basic understanding of PHP, Laravel, HTML, CSS, JavaScript, and MySQL. This role offers hands–on experience and mentorship in a professional development environment.

GeekBase Technology
Web Developer
Jul 2024 – Present

: As a Web Developer Intern, I will support the development and maintenance of websites and web applications. Responsibilities include coding in HTML, CSS, JavaScript, and other web technologies, debugging and troubleshooting, collaborating with the development team, and learning best practices in web development. This role offers practical experience and the opportunity to work on real projects under the guidance of experienced developers

Education

Bachelor of Science (B.Sc)
Computer science
Vidynan Mahavidyalay Malkapur
2024 (Full time)

Social work

NSS valunteer

As an NSS Volunteer, I will help conduct health education sessions, assist in health check–ups, and promote hygiene practices in the village. You will engage with villagers to raise awareness about nutrition, sanitation, and disease prevention. This role provides hands–on experience in community health initiatives.
